EVENT PHILOSOPHY

The Regional Synchronized Skating Championships are part of the Skate Canada Synchronized Skating Championship qualifying system. These events are planned, managed and executed by Skate Canada Sections on a rotational basis, in conjunction with a local volunteer organizing team.

The purpose of this competition is to provide a developmental and competitive experience for synchronized skating teams which allows them the opportunity to qualify for the Skate Canada Synchronized Skating Championships in Novice, Intermediate, Open, Junior and Senior categories. The top team in each of the five qualifying categories in every Region may advance to the Skate Canada Synchronized Skating Championships. Additional entries are allotted to regions based on their teams' placement at last year's National Championships and regional membership sizes.

In selecting host sites for these Championships, every attempt is made to move the event across each region in a regular cycle, to balance the costs faced by participants from year to year as much as possible, and to allow synchronized skating to be presented in various communities in each section.

In addition to experiencing the challenges and personal growth involved in competing at this level, one of the features of this competitive system is to allow skaters an opportunity to experience the cultural diversity of Canada through exploration of the area holding the championships.

The focus for skaters at this event is not only on qualifying for the Skate Canada Synchronized Skating Championships, but on the whole experience: self-satisfaction in achieving competitive goals and meeting competitors from across the region, and experiencing the camaraderie of traveling as part of a team.

GENERAL INFORMATION

The 2017 Atlantic Regional Synchronized Skating Championships will be conducted in accordance with Skate Canada rules and regulations for qualifying Synchronized Skating events. The host club for this event is the Conception Bay South Skating Club of the Newfoundland and Labrador Section – Skate Canada.

(Should a team decide not to compete due to insufficient entries, they must still submit all required forms and entry fees by the registration deadline.)

SINGLE ENTRY TEAMS (Novice, Intermediate and Open)

Should a category only have one entry, the team will be given the option to not attend the Regional Championships and will qualify directly to the Synchronized Skating Championships. Single entries will be notified no later than one week following the entry submission deadline and will be given the option to skate an exhibition and be assessed/monitored by a full panel of officials. Detail sheets by official will be provided following the performance in this case. If two or more entries have registered, the event will take place regardless of qualifying entry quotas.

ALTERNATES

There can be up to a maximum of 4 alternates for any team in all categories.

PROBLEMS DURING A PERFORMANCE

The Technical Representative or his/her designate (ice level referee) may ask a team alternate to go on the ice during a performance to retrieve any objects that have dropped on to the ice (hair accessories, etc.) so that a performance does not have to be interrupted and so that there is no danger to the skaters. To this end, it is requested that each team, where possible, have an alternate dressed with skates on and skate guards off, available at the entrance area during the team's performance.

DRAWS

A random draw will be used for the first portion of all events. The Chief Data Specialist as per Event Management Handbook - Section 7000 - G - 1.5 will conduct the draws. The starting order for qualifying events for the first portion of the event will be available ten days prior to the start of the competition. The drawn starting orders (initial and subsequent) shall also apply for the official practice ice for all parts of the competition (if practice ice is available and being offered).

The draw for all subsequent events (including those events where the free program is skated twice) will be conducted at the Conception Bay South Arena. Upon registration, teams will be notified of the location and times for all draws.

A coach and/or team captain shall be in attendance for all subsequent draws. In the event that a team is not represented, the Technical Representative will make the draw on behalf of the team. Draws for subsequent parts of the event will be posted immediately following the results of the previous part.

STARTING ORDERS (Event Management Handbook - Section 7000-G-1.5)

- 1) **STARTING ORDER FOR THE FIRST PART OF AN EVENT:** The skating order shall be determined by a random draw in each event with the following exception: should a Short Program and Free Program constitute one event, the starting order for the Free Skating Program shall be determined from the results of the Short Program as follows:
- 2) **STARTING ORDER FOR SUBSEQUENT PART OF AN EVENT:** As soon as possible after the determination of the results of the preceding part, the Referee or Assistant Referee, in the presence of at least one team shall divide the teams for the purpose of the draw for the next succeeding part (in the order in which they finished in the previous part) into the smallest possible number of equal groups. If the number of teams is not equally divisible, the last group to skate (and as many preceding groups as necessary) must contain one more team than the first group. The lowest placed group must skate first, the next lowest second and so on.

TIES (CPC Regulations, Section A – 105 - 2 Determination of results in each part of a competition):

If two or more teams have the same result, the Total Technical Score will break the tie in the short program and the Program Components Score will break the tie in a free skate program. If these results are also equal, the teams concerned will be considered as tied.

CONDUCT OF EVENTS

See Skate Canada Event Management Handbook - Section 7000 E, & G, and Skate Canada CPC Regulations (Section A and B) for specific rules governing the Regional Synchronized Skating Championships, which take precedence over other rules for competitions of Skate Canada, as set forth in all other parts of the Skate Canada Rulebook and Policies and Procedures Manual. General competition rules shall apply where applicable.

RESULTS CALCULATION

The Cumulative Points Calculation System will be used.

MARKING/ JUDGING SYSTEM

Judging of Novice, Intermediate, and Open free programs will be as follows:

- Each team will skate their free program twice, each time may be with a different panel of judges. Final results will be based on the combined results of both skates as per the following factors:
 - In the first portion of the event, the total score of the free program will be multiplied by a factor of 0.5.
 - In the second portion of the event, the total score of the free program will be multiplied by a factor of 1.0.
- The draw for the second free program will be seeded, based on the results of the first program, in the same manner as an event with a short and free program component.
- The total mark for Program Components will be used to break a tie in both free programs.
